GDP per capita (current USD) GNI per capita 2017 (Atlas method, current US \$)

The **gross national income (GNI)** is the total domestic and foreign output claimed by residents of a country, consisting of GDP plus factor incomes earned by foreign residents, minus income earned in the domestic economy by nonresidents.

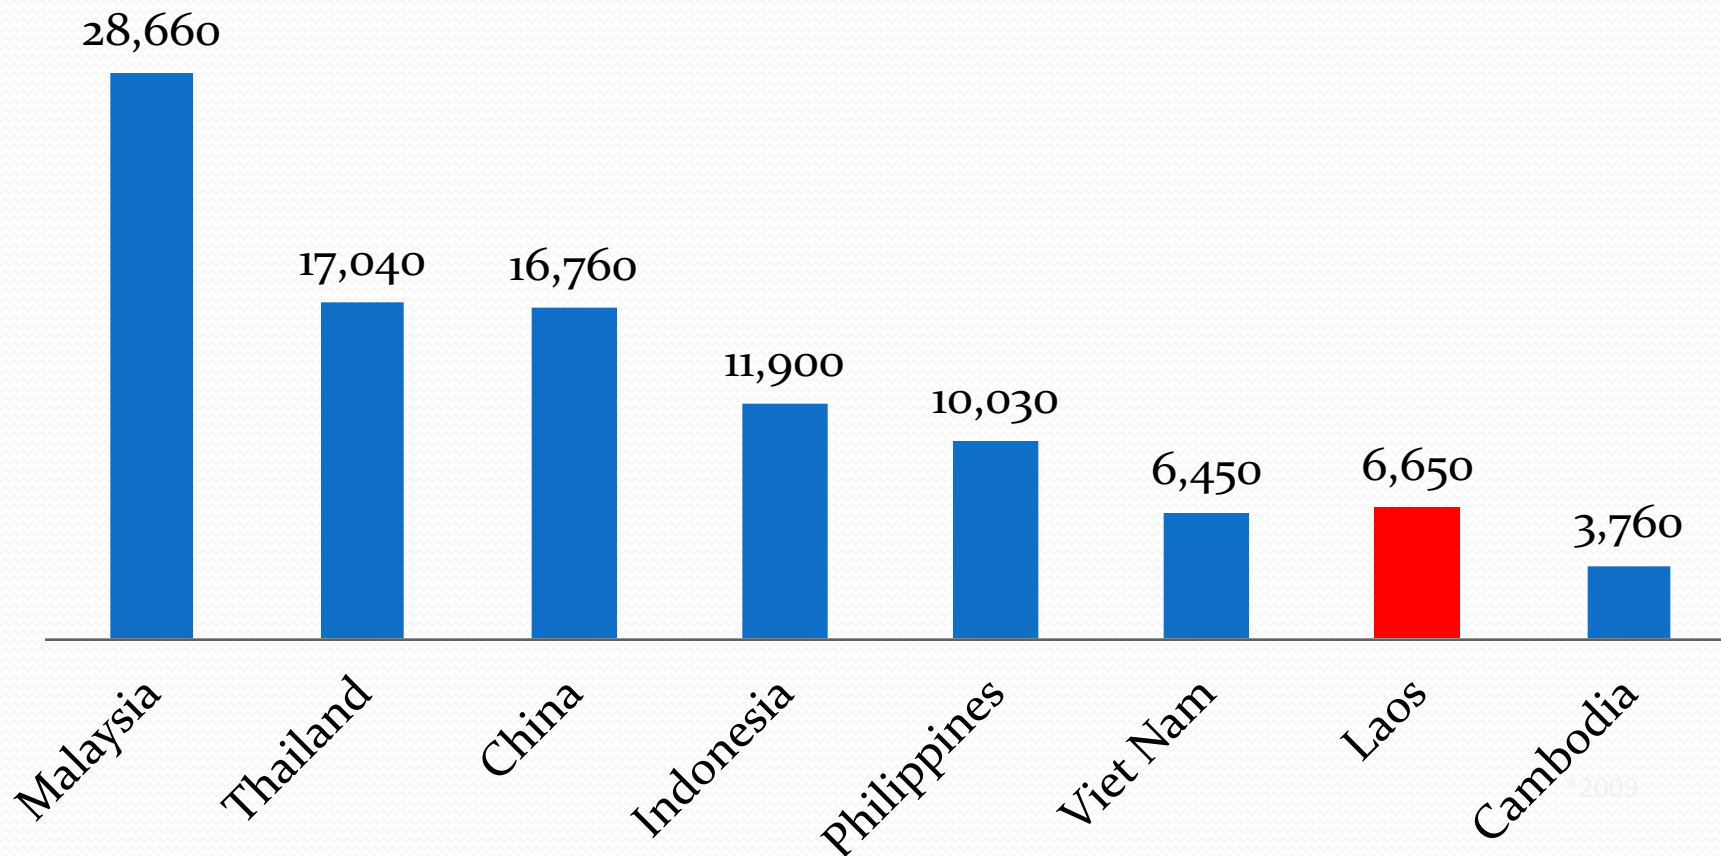

Comparing the GNI and GDP shows whether a nation's resources are put to domestic capital creation or flowing abroad.

OECD FDI Regulatory Restrictiveness Index, end 2015

[Contents](#)

Data refer to regulatory restrictions on FDI as of end-2015. For all other countries, data refer to the regulatory regime as of end-2014; ASEAN9 refers to the average scores of the nine ASEAN member states covered. It excludes Brunei Darussalam which is not covered. Data for Lao PDR, Viet Nam, Cambodia, Singapore and Thailand are preliminary; The OECD FDI Regulatory Restrictiveness Index covers only statutory measures discriminating against foreign investors (e.g. foreign equity limits, screening & approval procedures, restriction on key foreign personnel, and other operational measures). Other important aspects of an investment climate (e.g. the implementation of regulations and state monopolies among other) are not considered.
